

Castle Computer Services delivers a complete finance and employee management system Total solution for FCH Housing and Care

Castle were chosen to implement the system because of their unique understanding of the housing sector and its needs, combined with the company's unique PQIS quality assured implementation methodology.

Paul Sutherland of Castle Computer Services comments: "We have implemented a fully integrated solution that delivers an outstanding level of functionality for FCH housing and specifically meets their needs as well as coping with the reporting requirements of the sector such as FV3 and CIS reports."

Mark Askey, Project Manager at FCH Housing and Care adds: "We were impressed with Castle's understanding of the housing sector and their ability to take account of our organisation's needs. Their commitment and enthusiasm ensured that the project was delivered on time and within budget using their unique PQIS approach.

The combination of SunSystems with HR Cintra Payroll and Personnel gives FCH Housing and Care a fully integrated system that meets all their operational needs delivering all the necessary functionality for effective management control."

FCH Housing and Care supports vulnerable communities, households and individuals in the Midlands with equality as their core value. It is a charitable organisation providing some 4000 affordable homes and supporting over 1000 individuals through its care and support services.

The organisation has nearly 50 years of experience of housing and care. It develops new accommodation where the need has been carefully identified and continues to expand its housing and supported living services. With a central office in Birmingham, FCH Housing and Care operates through a further five offices

around the Midlands. FCH needed a financial system that incorporated HR & Payroll.

They chose Castle Computer Services to install SunSystems financial management software, integrated with HR Cintra payroll and personnel. SunSystems is one of the leading financial management packages in the world, combining flexibility with extensive control and reporting. It integrates with HR Cintra, the all-encompassing solution that handles every aspect of HR and payroll management.
