What will I achieve?

Many now acknowledge that server consolidation using virtualisation makes a compelling cost and power saving case and is now part of mainstream technology. However, what is often overlooked is its increasingly important role in protecting organisations, enabling them to function better and freeing IT departments to focus on adding value.

Whether you have budget to review your IT strategy or not; we hope you agree that it is essential to know more about the implications of Server Virtualisation Technology; and to help, we will provide the opportunity for you to discuss your situation with our technical and commercial consultants.

Designed to give you all the information you need to make the right virtualisation decisions for your organisation, this focused half-day workshop provides a full agenda of presentations, demonstrations and interactive Q&A with VMware specialists.

Who Should Attend?

Any IT professional who is involved in planning and implementing virtualisation in their organisation.

Agenda

- 09.30 Registration with Tea / Coffee
- 10.00 Welcome
